

IPC'S EARTH CARE TEAM PROJECT

RECYCLE #5 PLASTICS

HOW TO JOIN US

Bring your clean/rinsed #5 plastics to the big, white Super Sack next to the dumpster behind the church Monday - Friday from 8:30 am - 4:30 pm. Group or individual volunteers are also needed to help deliver full Super Sacks on a monthly basis.

COMMON #5 PLASTICS

Yogurt cups and tubs, sour cream and cream cheese tubs, margarine tubs, microwaveable and takeout containers, puppucino and hot drink lids, & plastic storage bins. Most of these containers are marked with a tiny 5 inside a triangular arrow on the bottom underside. *Plastics marked #1-4 or #6-7 cannot be accepted for this recycling project.*

BENEFITS COMMUNITY ON THE RISE

Once each Super Sack fills, it is taken to Community on the Rise where women are employed creating beautiful household objects and jewelry.

To volunteer for a Super Sack delivery or receive more information about this project, please contact IPC Community Ministries Team member Caitlin Miller at 205 520-4351 or cmurphreemiller@gmail.com.

FIGHTING POVERTY WITH INNOVATION

At Community on the Rise, the innovators are survivors of homelessness. The team recycles plastic waste into beautiful, eco-conscious goods, making Community on the Rise the only nonprofit organization in Alabama recycling #5 polypropylene plastic waste at an onsite workshop. The hands at Community on the Rise are changing the recycling options in Birmingham, Alabama, and they are doing it while they work to restore themselves and climb toward their life goals.
