

## **IPC Day School Immunization Policy**

- **You have the power to protect your child.**
- **In light of recent vaccine-preventable disease outbreaks and appropriate research, the Day School Committee, including our committee pediatrician, has updated our immunization policy.**
- **To attend the Independent Presbyterian Church Day School, children must be immunized with the Centers for Disease Control and Prevention, American Academy of Pediatrics, and the American Academy of Family Physicians recommended following vaccines according to their appropriate age guidelines: RV (Rotavirus), DTaP (Diphtheria, Tetanus, & Pertussis), Hib (Meningitis), MMR (Measles, Mumps, & Rubella), PCV (Pneumococcus), IPV (Polio), and Varicella (Chicken Pox). Verified health exemptions will be taken. Having our students vaccinated will help protect children under the recommended vaccination age, our students with compromised immune systems, and pregnant mothers.**
- **Thank you for doing your part in providing our children and families with safe and long-lasting protection.**

**If you have any questions, please call Kay Roller at 205 930-8166.**
